

EYE Enabling Youth Entrepreneurship Support Group Project

Gabriela Solomon
Project Coordinator
Syracuse, Italy 27.08.2015

To whom it may concern

We would like to recommend **Francesco Pira** representing the organisation **EESTEC Catania** in his capacity of contributor to the activities of our project.

EYE Enabling Youth Entrepreneurship Support Group Project is a 24 months research project to uncover the potential of young entrepreneurs across Europe, rethinking the incubation and support processes that could lead them to design, implement and run sustainable ventures. The project is financed by the Erasmus+ Programme – Cooperation and Innovation for Good Practices and involves four organisation from Romania, Macedonia, Italy and The Netherlands.

Francesco participated in the event “**Y Incubate for young entrepreneurs**” organised in Siracusa and his contribution was very valuable for testing the tools developed in the second phase of the project – the methodology consisting of different tools, guidelines, activities to enable and spark entrepreneurial behaviour and desire into European youth.

His vivid communication skills, his excellent rapport with all the participants of the event (team members, partner representatives, researchers and colleagues), his entrepreneurial attitude recommend him for pursuing studies in his desired field, for participating into an incubation program and for contributing to similar European projects and activities.

Sincerely,

Gabriela Solomon
